

# Zero-Dose Learning Hub Highlights

January–June 2024

## Synthesized Learnings Across the Four Country Learning Hubs

The [ZDLH Semiannual Update](#) outlines the consortium's efforts to use evidence to better understand factors affecting the implementation and performance of strategies to identify and reach zero-dose and under-immunized children, as well as missed communities.

### Provided Ongoing Support to Country Learning Hubs

JSI provided feedback on the **Mali** Country Learning Hub's (CLH) implementation research (IR) protocol, discussed IR methodology, and is assisting the CLH in finalizing the IR protocol and tools in preparation for a household coverage survey. JSI also prepared to conduct a lot quality assurance sampling training workshop for the Mali CLH team and assist with data collection.

In **Bangladesh**, JSI worked closely with IHMHR on the political economy assessment draft report, provided feedback on the baseline implementation report, and offered guidance on the tools and protocol for a research activity involving Forcibly Displaced Myanmar Nationals, advising on best practices for working with refugee populations.

In **Nigeria**, JSI collaborated with the African Field Epidemiology Network (AFENET) to support the Decentralized Immunization Monitoring initiative to review pilot data and address challenges. JSI also offered recommendations for enhancing survey reports, led a refresher training in Abuja, assisted in developing an implementation plan and sampling frames, and provided ongoing remote support as well as feedback on AFENET's implementation research protocol.

In **Uganda**, JSI reviewed and provided feedback on several key reports, including the learning agenda report, rapid assessment report, systems landscape report, and community survey baseline report. Discussions with the CLH team revealed the need for further support on the theory of change, with plans for additional assistance.

### Completed Five Webinars That Reached 1,359 Unique Viewers:

1. [Country Learning Hub Spotlights: Reflections on Identifying and Reaching Zero-Dose Children](#)
2. [Vaccinating Every Child: Promising Strategies for Reaching Zero-Dose Children in Bangladesh & Nigeria](#)
3. [Vaccinating Every Child: Promising Strategies for Reaching Zero-Dose Children in Mali & Uganda](#)
4. [Equity in Action: Local Strategies for Reaching Zero-Dose Children and Communities](#)
5. [Pro-Equity Strategies to Reach Zero-Dose Children](#)

### Uploaded 22 Resources to the ZDLH Website

The most downloaded resources included:

1. [Nigeria Zero-Dose Landscape](#)
2. Webinar slides – [Country Learning Hub Spotlights: Reflections on Identifying and Reaching Zero-Dose Children](#)
3. [Uganda Zero-Dose Landscape](#)
